Dear Colleague

**Ad Hoc Vaccinations**

As part of the ongoing programme of primary care transformation from the 1<sup>st</sup> April 2022 general practices are no longer responsible for delivering vaccination

Should you require to refer any patients to complete a primary courses of vaccination or should they become newly eligible due to their condition then a new service is being established

In the interim there is an online referral form accessed via this link  
<https://forms.office.com/r/GGAGSZq1Sz>

On receipt of the form our Contact Centre will contact the patient and arrange an appointment for them to attend one of our vaccination centres. Please advise your patient that they may receive a call from a 0800 or withheld number.

We are currently working through the logistics associated with this and initially will be prioritising urgent referrals

Sincerely,

A handwritten signature in black ink that reads 'Jane A. Beresford'. The signature is written in a cursive style.

Jane A. Beresford

Public Health Programme Manager - Vaccinations
