

Clyde Atraumatic Limp/Limb Pain Pathway

Please see NHS GGC paediatric guidelines for a more detailed guide to assessment and differentials: [NHS GGC - Atraumatic painful limb \(scot.nhs.uk\)](https://www.scot.nhs.uk/nhs.uk/ggc/paediatric-guidelines/trauma/atraumatic-painful-limb)

For children with definite injuries please follow Clyde fracture guidelines on CEM. Be aware that children may present with co-incidental minor injuries. If in doubt seek senior advice.

All children you wish to book onto STC should be discussed with a senior.
