

GUIDE TO USING THE PROJECTOR

1. Connect the Laptop to the Projector with the 9 pin cable
2. Turn on projector & laptop
3. If the projector doesn't automatically detect the signal from laptop, send signal from laptop to projector. This will require pressing both the "Fn" also known as the function key and an F7 (just look for a picture of a monitor d on a "F" key on the top row of buttons)
4. Options for choice of projections should come up on the screen and you can choose from, projector only, dual/duplicate, laptop only, or continuous. The dual/duplicate setting is ideal for teaching.
5. Focus and adjust the picture size on the screen

OK

6.4 How to connect projector with iPad or iPhone/ Android phone with MHL function?

6.4.1 To connect projector with iPad, you will need a WIFI display dongle to connect them, and choose "HDMI" as "input source".

6.4.2 To connect projector with Phone, first of all, please confirm that your phone support MHL (Mobile High-Definition Link) function. Then you will need a WIFI display dongle or a MHL cable to connect phone and projector, and choose "HDMI" as "input source".

7. Trouble Shooting:

Troubles	Solution
No power	Please check whether the projector power adapter is plugged well, and whether the remote control battery is installed.
No Image or Sound	Please check whether the signal input interface (VGA / HDMI / AV / USB / SD Card) is seated properly, and check whether the source file is in good condition.

No Sound	Please check whether the signal input interface (VGA / HDMI / AV / USB / SD Card) is seated properly, check whether the volume is adjusted to the minimum position.
No Image	Please check whether the signal input interface (VGA / HDMI / AV / USB / SD Card) is seated properly, and check whether the brightness, contrast is adjusted at the minimum position.
Image blur	Please check whether the image focus is correct, check whether the projection distance is beyond the maximum range, and check the signal source file is in good condition.
Color Weak	Please check whether the color and color temperature adjustment is normal.
System Crash	Restart the projector after power off.
MHL Failure	Please make sure your phone support MHL-out function. (Many Android smart-phone do not support MHL function.)
